Hiring Manager

GitHub
Minneapolis, MN

Dear Hiring Manager:

I am very excited to be applying for Software Engineer I at a company whose services I use daily! I discovered this position on LinkedIn, and was drawn in by the company culture, as well as being in my home state of Minnesota.

I am approaching five years of full stack development in web and desktop applications. This exceeds the qualifications for 1+ years of C#, dotnet core, JavaScript, and relational databases (SQL) as outlined in the listing. I exclusively use GitHub for version control, as I develop on multiple machines and at times in a team environment.

Currently, I am developing a web app that uses Microsoft DevOps to automatically build and deploy GitHub commits to an Azure App Service for CI/CD. It is a personal project for learning deployment through version control in production. The app is for visualizing unstructured text analysis.

Attached and linked below, you will find my resume detailing other relevant projects and experience. The resume also lists employment and education history.

Thank you for your time and consideration. I look forward to discussing my skills further and what I can bring to GitHub. You can reach me at 218 290 6677, or email at gmckeever88@outlook.com.

Best regards,

Gary McKeever
